MG

A website that wins *custom homes.*

A new site for Maison Gray, built around your real projects, your story and a consultation process that brings you serious clients.

PREPARED FOR GINA & ANDREW · LARGE TECHNOLOGIES · OCTOBER 2026

WHAT'S INSIDE

Four parts, *one plan.*

01

Where you are

What Maison Gray is doing online today, and what it's costing you.

02

Your competitors

What seven local design-build firms do online, and the gaps none of them fill.

03

Your new site

A full tour of the website we've already built for you, section by section.

04

Your results

What's done, what's left, and the results this system is built to deliver.

Great work, *hard to find.*

Website
OUTDATED

One Wix page, last updated around 2022. No project pages, no tracking, footer says ©2016.

Google
WRONG NAME

Your site tells Google it's "Black Hills Design & Build | Hinsdale". We couldn't find a Google Business Profile.

Instagram
STRONG

About 1.8K followers and a full custom build documented week by week. Your best marketing asset today.

Houzz
STARTED

Profile with 4 projects and 23 service areas, but 0 reviews.

Lead capture
BASIC

An old Wix contact form, a phone number and an email. No budget or timeline questions, no follow-up.

Tracking
NONE

No Google Analytics, no Meta Pixel, no CRM. You can't see where clients come from.

Time-sensitive: maisongraydesigns.com is registered until **October 30, 2026**. Please confirm auto-renew is on with GoDaddy so the domain doesn't lapse.

Your work is excellent. Your website *hides it.*

01 Google shows another name

Page title, description and share previews all say "Black Hills Design & Build".

02 The menu goes nowhere

Home, About, Services and Contact all return to the same single page.

03 No portfolio

Only a few images, including screenshots and one stock photo. None of your custom build.

04 No way to qualify leads

No form asking budget, timeline or location, so every inquiry starts from zero.

05 Invisible locally

"Chicago - Southwest Michigan" gives Google nothing to rank, even though you serve 23 towns.

06 Trust signals missing

No reviews, no process, no photos of Gina and Andrew, default Wix icon in the browser tab.

What *nobody* is doing yet.

The bar is lower than it looks. Even the biggest local firms leave these open, and Maison Gray can own them.

A planning guide

No competitor offers a "Custom Home Planning Guide" download. It turns browsers into leads months before they're ready.

Build in public

Almost none show a project unfolding. Your weekly Instagram updates become a live build story on your site.

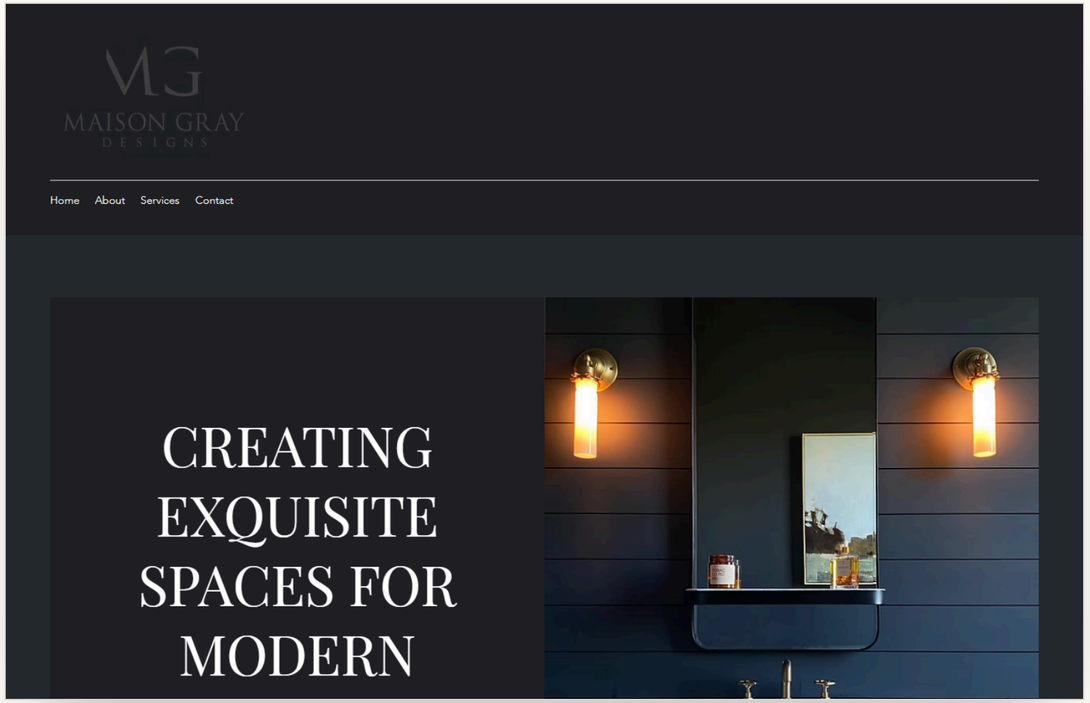

Designer + builder

Few firms can say one couple designs and builds. It's your strongest selling point, and today it's buried.

Chicago and Michigan

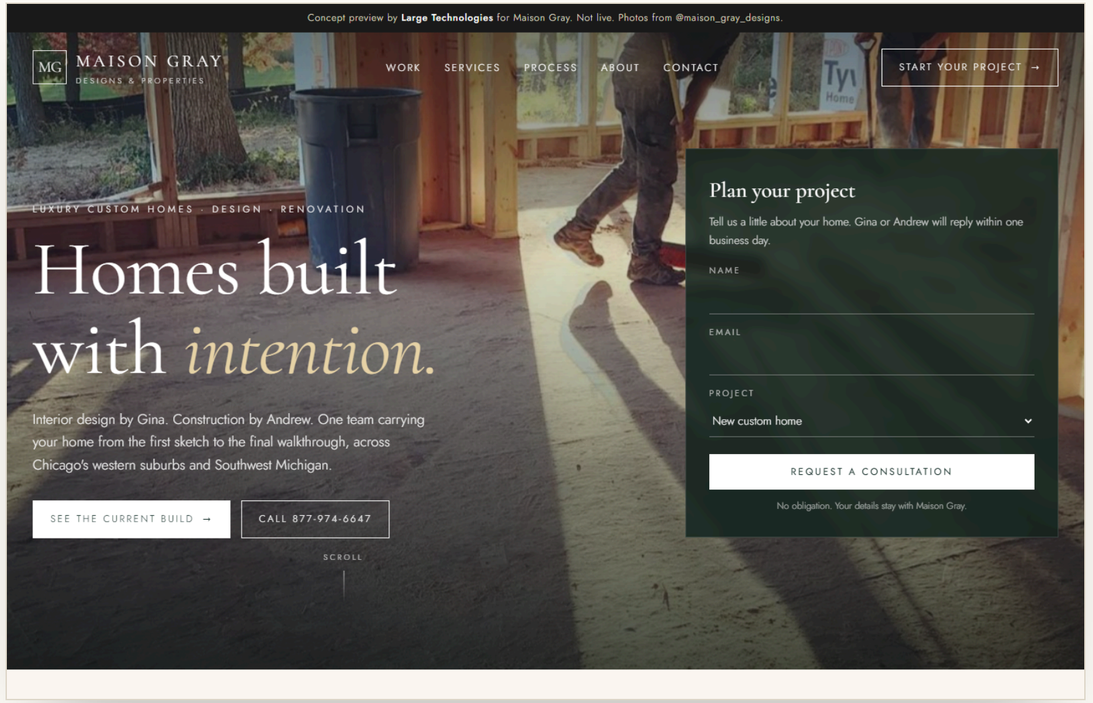

No one serves both the western suburbs and SW Michigan lake homes with one brand. You can.

We already built *your new site.*

TODAY

One dark page, a stock photo and no way to see your builds.

NEW SITE

Your real projects, Gina and Andrew front and centre, and a consultation form on the first screen.
