Evans Ademilua

Full-Stack Software Engineer

Ile-Ife, Osun, Nigeria (remote, overlaps US and EU working hours) | ademiluaolufemi@gmail.com | linkedin.com/in/evansademilua | evansademilua.vercel.app | Upwork profile

SUMMARY

Full-stack software engineer with over three years of hands-on experience building and fixing production web applications in Python (FastAPI), TypeScript, React, Next.js and PostgreSQL (Supabase). Experienced in integrating LLM APIs (OpenAI, Claude) and automation workflows (n8n), and in taking over unfamiliar or misbehaving codebases, isolating the real fault and shipping clean fixes without regressions. Top Rated on Upwork with eight 5-star client reviews. Seeking remote, contract-based work in software engineering, code review and AI evaluation.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript
Frameworks: FastAPI, React, Next.js, Node.js, Tailwind CSS, REST APIs
Data and infrastructure: PostgreSQL, Supabase (authentication, row-level security), Vercel
AI and automation: LLM API integration (OpenAI, Claude), n8n workflow automation, Slack bot development
Low-code platforms: Bubble.io, FlutterFlow, Webflow
Working style: Debugging third-party code, scoping with clients, clear written communication, fixed-scope delivery

PROFESSIONAL EXPERIENCE

CEO and Founder, Large Technologies Ile-Ife, Osun, Nigeria (remote) — Sep 2026 to Present

- Lead scoping, architecture and delivery of custom software for service businesses: internal tools, client portals, booking and lead-tracking systems, and AI-assisted features.
- CareTRAC: field and client coordination platform for a construction company. FastAPI backend with a dedicated scheduler service so slow photo uploads never block status updates, React frontend, and role-based permissions enforced at the database level. Scope call to live product in two weeks.
- Sky Team Ife: internal operations dashboard for a multi-location organization, built on Vercel and Supabase with per-user accounts scoped by role and center and enforced with row-level security.
- Common Ground Engineering: booking and lead-capture site integrating the Cal.com and Telegram APIs.

Web Developer (Freelance), Upwork Remote — Jan 2023 to Present

- Top Rated, with eight 5-star client reviews across Bubble.io application builds and fixes, n8n workflow automation, Slack bot development and AI integration work.
- Take over applications that behave unpredictably in production, isolate the actual fault and ship clean fixes without regressions. Clients consistently cite clear communication and delivery beyond expectations.

No-Code and Low-Code Developer (Freelance), Fiverr Remote — Dec 2022 to Present

- FlutterFlow and web development for small-business clients: MVPs, booking flows and internal tools delivered against fixed scopes.

Founder, 100bits Agency Remote — Mar 2024 to Present

- Bespoke website design and digital direct marketing for small business clients. Own delivery end to end.

Sales Manager (Contract), Real Estate UK Remote — Jul 2020 to Aug 2023

- Lead generation and marketing outreach for UK property clients. Source of the real estate domain knowledge behind current product work.

SELECTED PROJECTS

- **CareTRAC** (FastAPI, React). Client portal for a construction company. portal.caregencon.com
- **Sky Team Ife** (Vercel, Supabase). Operations dashboard with row-level security. sky-team-ife.vercel.app
- **Billionaire Club** (Next.js, Vercel). Community and education platform. billionaireclub.vercel.app
- **Common Ground Engineering** (Cal.com and Telegram APIs). Booking site for a consulting firm. cge-site.vercel.app

EDUCATION

B.Eng, Electrical and Electronics Engineering, Obafemi Awolowo University, Nigeria — 2020 to 2024
